

Learning Management System

experient learning is an open-source elearning platform for the provision of training online. Designed specifically for business use and for the management of complex educational processes.

experient learning is an ideal solution to carry out any training project: refresher courses, sales network support, ECM courses, or more. It can be used for social learning, gamification solutions, to support university and school education.

In its evolution **experient learning** introduces a new modular "plugin" architecture for easy integration of additional components.
